Treehouse Island, Inc.
Software Engineering Intern, Mobile · June 2013 to Aug. 2014 · Remote
Created iOS client app for in–house messaging system and prototyped new features for the public iPad application.

PROJECTS

Caption Remover iOS
Caption Remover (formerly Snappp) has been downloaded over 470,000 times. Upon becoming a paid app, Caption Remover entered the US Top 100 paid apps, and became the #2 paid US Social Networking app in the App Store. Caption Remover employs my own algorithms in conjunction with the OpenCV framework to automatically remove watermarks from Snapchat screenshots.

Bitcoin Live iOS
Wrote an app that used high-frequency push notifications to display the current exchange rate of Bitcoin on the app icon. Bitcoin Live reached #9 in the Finance category of the App Store.

AWARDS

Apple · CVE-2015-5892
Sept. 2015
Apple officially recognized me for discovering and reporting a security issue with Siri in iOS 8, which could be exploited by an attacker to access personal user information, including 2FA tokens, while a device was locked. Apple then fixed the issue in iOS 9.

Apple · WWDC 2015 Scholarship
May 2015

The National Speech and Debate Association · Degrees
Degree of Merit, Degree of Honor, Degree of Excellence, and Degree of Distinction.
